Members of the Defense Acquisition University toured Marine Corps Logistics Base Barstow, Calif., Oct. 20.

The DAU was created by the Department of Defense to provide civilian leaders with a high level of knowledge in the acquisition, technology and logistics workforces within the DoD.

The members of the DAU's Senior Service College Fellowship program spent the day touring the Nebo side of MCLB Barstow, then headed to the Yermo annex. They visited Fleet Support Division, Rail Operations and Production Plant Barstow. They also visited the test track to watch military vehicles, which had been reconditioned or repaired at the base, go through their paces over various obstacles and water hazards. 🇺🇸

Michael Milender, QCI inspector, and Mark Anderson, heavy mobile equipment mechanic, operating the Amphibious Assault Vehicle P7 A1 Ram/RS, make the abrupt transition from dry land to the watery depths of the

test track pond at Marine Corps Logistics Base, Yermo Annex, Production Plant Barstow, Oct 20. The members of the DAU tour group watch from atop the hill used to test a vehicle's ability to climb in steep terrain.

Members of the Defense Acquisition University tour group pose atop a light armored vehicle after watching the tank-like wheeled

weapons system hurl itself at various test elements at the Production Plant Barstow vehicle test track, Oct. 20.
