

DAU's New Learning Construct

The centerpiece of DAU's new learning construct is its "Performance Learning Model." The model includes four main thrusts, commensurate with the DAU mission: Certification training, continuous learning, knowledge sharing/communities of practice, and performance support. DAU is building a new learning environment that will provide lifetime performance support and empower DoD acquisition, technology, and logistics workforce members to identify and achieve their learning requirements.

PERFORMANCE LEARNING MODEL (NEW LEARNING CONSTRUCT)
