

2004 PEO/SYSCOM CONFERENCE

SYSCOMCDRS Panel: Supporting Revitalization of Government Systems Engineering

**Lieutenant General Joseph L. Yakovac, Jr.
Military Deputy to the
Assistant Secretary of the Army
(Acquisition, Logistics and Technology)
16 November 2004**

Concerns/Initiatives

The Role of Government “Systems Engineering (SE)” Was Easy to Define When the Focus Was on Non-Complex Systems. To Have a Role Today, We Must Think of SE in Terms of the Role of Government Joint System of Systems Engineering (JSoSE) or It Will Never Be Revitalized.

Points for Discussion

- **Role of JSoSE in the JCIDS Process**
- **JSoSE Support – Who Provides It: Services or Industry/Both?**
- **Adequacy of Current JSoSE Training (e.g. NDU, DAU, Certification?)**
- **Tools – How Do We Develop Tools with Focus on JSoSE?**
