

# Army Acquisition System Safety Program

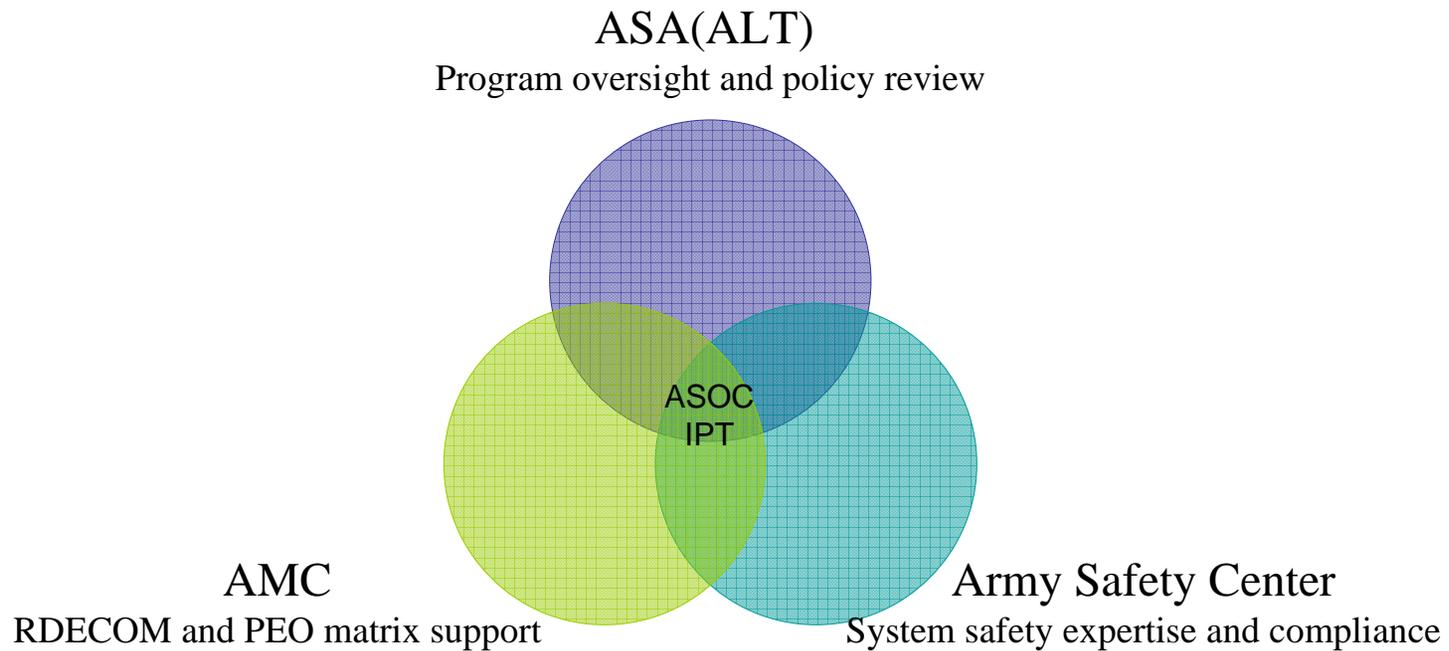

# Project Goals

- OUSD(AT&L) Guidance
  - Reduce DoD mishap & accident rates 50% in 2-years
  - Design safety in, not add it.
- All systems regardless of ACAT will be monitored
- Both new and fielded systems included

# Proposed program structure

# Team Responsibilities

# Procedures

- Integrate system safety into the overall risk management process
- Comply with MIL-STD-882D throughout the life cycle
- Integrate ESOH risk management into the Systems Engineering Plan
- Identify and mitigate ESOH risks

FOR MORE INFO...

MIL-STD-882D; DoDI 5000.2

# Way ahead

- Distribute the OSD Direction w/ Mr. Bolton endorsement
- MOA with Army Safety Center
  - Develop procedures
  - Identify safety review team
- MOA with AMC
  - Develop tracking system
  - Codify safety review and insertions
  - Identify current and future system candidates
