AFMC Announces Senior Leader Changes

AIR FORCE MATERIEL COMMAND PUBLIC AFFAIRS (MAY 2, 2013)

WRIGHT-PATTERSON AIR FORCE BASE, Ohio—Air Force Materiel Command officials announced May 2, 2013, that its executive director, Dr. Steve Butler, will retire effective June 30 after 35 years of service. He will be replaced by Michael Gill, currently executive director of the Air Force Life Cycle Management Center.

Patsy Reeves, currently AFMC's director of contracting, will become AFLCMC's executive director. Butler, Gill, and Reeves are all members of the Senior Executive Service.

Prior to Gill's appointment as AFLCMC executive director in July 2012, he was the executive director of the Odgen Air Logistics Complex (formerly Ogden Air Logistics Center) at Hill Air Force Base, Utah.

Gill's previous assignments include serving as the program manager for the Air Force Contracting and Manufacturing Civilian Career Program, as the director of the TRICARE

AT&L Workforce—Key Leadership Changes

Regional Office South, and as the director of contracting at AFMC. Gill entered the Senior Executive Service in 2001.

Prior to Reeves' appointment as AFMC's director of contracting in April 2011, she was the director of contracting for the Aeronautical Systems Center at Wright-Patterson AFB.

Reeves' previous assignments include serving as a program manager for multiple aircraft training systems, including the C-17; as the director of plans and programs at Brooks AFB, Tex.; and as the director of contracting at the Warner Robins ALC at Robins AFB, Ga. She was appointed to the Senior Executive Service in 2001.

Butler's previous assignments range from developing precision guided weapons to serving in senior advisory roles in the Office of the Secretary of Defense. He served as the deputy program director for the F-22 and the technical director for most of the Air Force's munitions inventory, including the Joint Direct Attack Munition. Prior to his current assignment, he was the executive director of Warner Robins ALC. Butler entered the Senior Executive Service in 1997.

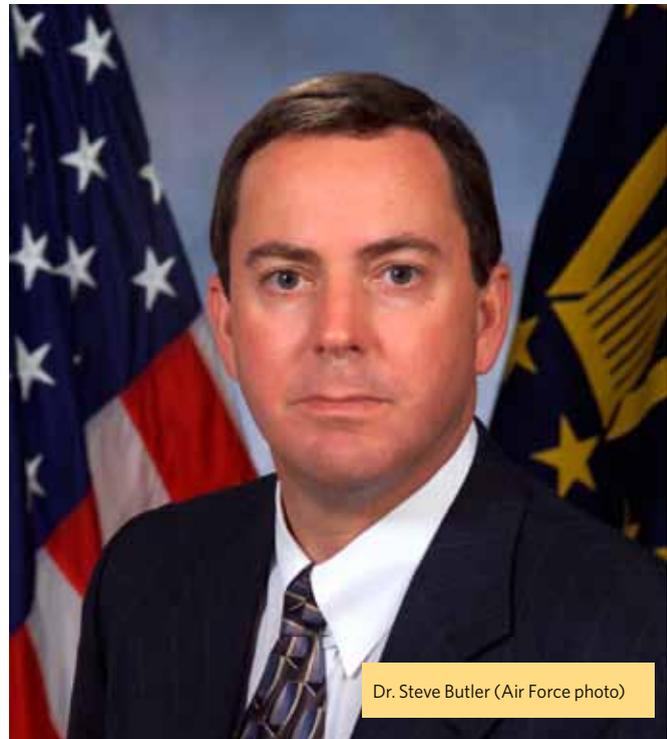

AFMC's executive director advises the AFMC commander in managing all aspects of the command's mission, serves as the services contracts advocate, and oversees the command's small business program. As the command's senior civilian, the executive director also advises the commander on labor union relations, and development of the civilian workforce. Civilians make up more than 70 percent of the command—the highest percentage among all Air Force major commands—and AFMC employs 40 percent of the total Air Force civilians.

AF Science Guru Appointment Closes Out

SECRETARY OF THE AIR FORCE PUBLIC AFFAIRS (MAY 31, 2013)

Air Force Staff Sgt. David Salanitri

WASHINGTON—The Air Force's chief scientist will spend his last day on the job May 31 after more than two and half years in the Pentagon.

Dr. Mark Maybury's time with the Service is heavily marked by major strides in science and technology.

Three of those major changes include studies that created roadmaps for energy, cyberspace, and research and development.

All three define how the Service can harness science and technology to its advantage.

His first research focused on energy. Why energy? The first sentence of the document entitled, *Energy Horizons* puts the bottom line up front.

"Energy is a center of gravity in war, and assured energy advantage can enable victory," it reads.

The 72-page plan aims to increase energy supplies, reduce demand, and change the culture to meet mission requirements.

His second study, *Cyber Vision 2025*, outlines the Air Force's vision for the science and technology, acquisition, and operations needed to provide the assured cyberspace advantage to the Air Force, combatant commanders, and interagency partners.

"It is cyberspace [science and technology] that can provide the assurance, reliance, affordability, and empowerment to mitigate and defeat these risks," Maybury said. "However, this requires integration across authorities and domains, shaping of doctrine, policy, people, and processes and intelligent partnering."

Finally, his third study, titled *Global Horizons*, identifies threats and opportunities in the near-, mid- and far-term through 2030. It identifies how to best leverage the \$1.4 billion in global research to achieve revolutionary Air Force advancements.

"These three strategic studies should have long-term impact," said Maybury, who is slated to work in the nonprofit sector. "Already we have seen the Air

Dr. Mark Maybury concluded his two and a half years of service as the Chief Scientist of the U.S. Air Force May 31, 2013. In this photo, Maybury speaks about Air Force Cyber Vision 2025, July 17, 2012, in Washington D.C. During his tenure as Chief Scientist of the Air Force, he focused his studies on programs that created roadmaps on energy, cyberspace, and technology.

U.S. Air Force photo by Senior Airman Christina Brownlow

AT&L Workforce—Key Leadership Changes

Force benefit from the insights of our Air Force team. It also has helped us focus our investments [on] what is most critical.”

One of the accomplishments that stand out to him is linking the Air Force with other agencies as well as internationally.

When it comes to building those relationships, Maybury said, “you only have a limited time.”

With his days as the Air Force chief scientist closing fast, Maybury encourages the upcoming generation of students to explore the technology and cyber realm.

“I especially want to encourage parents and students to seek to excel both in science, technology, mathematics and engineering, but also in the arts,” he said. “STEM is the foun-

ation of our productivity, economic competitiveness, and military strength. Moreover, it’s a doorway into an exciting and limitless career.”

As Maybury makes his way out of the Air Force, his motivation to do great things is abundant.

“I’d like to say to any kids or parents listening out there, that I was just a little boy from a small town, Chelmsford, Mass.” he said. “You can do anything if you work hard, excel in school, and learn from [others].”

Those who worked with Maybury describe him as energetic with a “type A” personality who gets things done, and while he’ll no longer be the Service’s top scientist, he isn’t going far, as he’s been nominated to serve another four years on the Air Force Scientific Advisory Board.
