

Appendix F—Other Products and Services Provided by DAU

The University's mission is to provide practitioner training, career management, and services to enable the Acquisition, Technology, and Logistics (AT&L) community to make smart business decisions and deliver timely and affordable capabilities to the warfighter. Accordingly, in addition to classroom and online training, DAU offers other valuable products and services. This Appendix provides some information on those products and services as well as Web addresses for more details on each.

Strategic Partnerships

DAU has established numerous strategic partnerships with academic institutions, corporate universities, other government agencies, professional organizations, and industry. While each partnership is unique in what it offers, the objective of all partnerships is to provide students with opportunities to maximize their academic accomplishments. In most cases, students may apply credit for DAU courses toward a graduate, undergraduate, or certificate program offered by a strategic partner. Similarly, credit for college classes

can be applied toward DAWIA certification (see Appendix C) or DoD continuous learning requirements. DAU is working to ensure that opportunities are offered at both the undergraduate and graduate degree levels and in disciplines that are important to DAWIA certification for all career fields. For example, our partnership with the Florida Institute of Technology emphasizes business-related programs, such as Acquisition Management and Contract Management. Our partnership with Georgetown University can lead to an Executive Master's Degree in Public Policy Management or certificates in various programs. DAU also has an agreement with George Mason University that focuses on Logistics programs, and one with Stevens Institute of Technology that concentrates on Systems Engineering.

A list showing some of DAU's Strategic Partners and the types of agreements we share with them is provided on the following page.

For an updated list of DAU's partners and links to their respective Web sites, visit the DAU Web site at <http://www.dau.mil>.

Applied Research

The fundamental purpose of DAU's research program is to improve the DoD acquisition process and its management. The scope of applied research topics encompasses policy, process, education, management, leadership, and functional area initiatives generated by the DoD AT&L community.

Research projects are conducted by the DAU faculty in partnership with acquisition practitioners, universities, nonprofit organizations, and private industry. Utility is determined by direct application of a viable product

that supports DoD goals and priorities. Selected participants from within the Services, DAU strategic partners, and DAU faculty develop new and innovative concepts for systems acquisition.

For more information about the research program at DAU, visit our Web site at http://www.dau.mil/research/research_main.asp; join us in the Acquisition Research Community of Practice at <http://acc.dau.mil> (under Special Interest Areas, select Acquisition Research); or contact Dr. Paul Alfieri, Research Program Director, at paul.alfieri@dau.mil.
