

Simulation & Modeling for Acquisition, Requirements, and Training—SMART

Does your program or project need assistance in implementing Simulation and Modeling for Acquisition, Requirements and Training—SMART? Army SMARTeam contact teams provide information, recommendations, and technical assistance to programs and projects about simulation support planning and implementing SMART. Contact team members discuss how to apply modeling and simulation (M&S) throughout the acquisition life cycle, including how to identify opportunities to reduce risk and costs and accelerate traditional acquisition processes. They share information about models and simulations that could be reused or adapted, as well as SMART lessons learned and best practices from other programs and projects. Contact team members also offer advice on simulation support planning, available M&S products and tools, simulation environments, and advanced collaborative environments. Army SMARTeam contact team customers include integrated concept teams, program and project managers.
