MEMORANDUM FOR SECRETARY OF DEFENSE
DEPUTY SECRETARY OF DEFENSE

SUBJECT: GAO Draft 2009 Assessment of Selected Weapon Programs

GAO is about to publish their annual assessment of defense acquisition programs. I have attached the highlight page. Since GAO does not generally note positive progress, I want to emphasize a few key good news points in the highlight page:

- "DoD performance in some of these areas is driven by older programs."

- "newer programs, on average, have not shown the same degree of cost and schedule growth."

- "For 47 programs, GAO assessed in-depth, the amount of knowledge attained by key decision points has increased in recent years."

- "In December, 2008, DoD revised its policy for major defense acquisition programs." This is the new DoD 5000 Directive on acquisition program management.

- "The (new DoD 5000) policy recommends holding early systems engineering reviews; includes a requirement for early prototyping; and establishes review boards to monitor requirements changes - all positive steps."

The report also notes a minor reduction in the estimated total acquisition cost growth from $301B to $296B, despite an increase from 95 to 96 in the number of programs. We will fully analyze this report and provide you a more detailed summary.
I would note that I continue to struggle to get billets and funding for new positions in AT&L and throughout the defense enterprise. I believe GAO accurately notes that "A majority of the programs GAO assessed were unable to fill all authorized program office positions, resulting in increased workloads, a reliance on support contractors, and less personnel to conduct oversight."
